PROFESSIONAL SUMMARY

Data Engineer working hands-on with Python and data since 2022, with experience building scheduled pipelines, running data quality checks, and preparing reliable datasets for reporting and dashboards. Builds pipelines with SQL, Python, Bash, Apache Airflow, and dbt on Google Cloud, monitors scheduled jobs through logs, and documents sources, transformations, and definitions. At KPMG Nigeria, validated and reconciled data from financial services and other client systems under strict confidentiality, maintaining audit trails so every figure was traceable. Google Cloud Certified Professional Data Engineer with certification knowledge of IAM, encryption, and access control. Mechanical Engineering graduate (Second Class Upper).

TECHNICAL SKILLS

SQL and Databases:	Advanced SQL (CTEs, window functions, joins), PostgreSQL, MySQL, BigQuery
Pipelines and Processing:	Python (Pandas), Bash, Apache Airflow, dbt, Kestra — ETL/ELT, scheduling, cron
Data Quality and Monitoring:	Validation and reconciliation checks, dbt tests, job monitoring and log-based troubleshooting
Documentation and Governance:	Data source and transformation documentation, business definitions, audit trails, access control and data protection concepts
Cloud and Tools:	Google Cloud (Cloud Storage, BigQuery, IAM), Terraform, Docker, Git, Linux, Power BI, Excel

PROFESSIONAL EXPERIENCE

Intern Analyst | *KPMG Nigeria*
July 2024 – Aug 2025
Lagos, Nigeria

- Collected, validated, and reconciled data from multiple client systems, including financial services clients, using SQL and Excel, identifying and resolving errors before data was used in reports.
- Prepared reliable datasets for management reports and built Power BI and Excel dashboards and KPI scorecards on weekly and monthly cycles.
- Documented data sources, testing steps, and findings so every figure was traceable, and handled sensitive client financial data under strict confidentiality requirements.
- Automated repetitive data tests with Excel, ACL Analytics, and SAP, and gave regular progress updates to engagement managers.

Teaching Assistant (Data Support) | *University of Benin*
Jan 2024 – May 2024
Benin City, Nigeria

- Supported a lecturer in managing student academic records, consolidating results from multiple courses into a single structured Excel dataset.
- Cleaned and validated the student results data, checking for missing scores, duplicate entries, and inconsistent records before analysis.
- Built PivotTable summaries of pass and fail rates by course and cohort, highlighting trends and courses that needed attention, and reported findings to the lecturer.
- Handled confidential student records with care, sharing results only with authorised academic staff.

Facility Maintenance Intern (Data and Operations Analysis) | *NNPC E&P Limited*
Jan 2022 – Jul 2022
Delta State, Nigeria

- Analysed generator performance log data using Python to model failure rates and support predictive maintenance at the Oredo Flow Station.
- Digitised paper-based maintenance records into structured databases, and worked within HSE protocols alongside maintenance teams.

TRAINING

Data Engineering Bootcamp | *Core Data Engineers*
Aug 2026 – Present
Remote

- 12-week, live, instructor-led programme. Completed Python, SQL, Linux, data engineering fundamentals, and data modelling modules; upcoming modules cover Docker, Airflow, Terraform, AWS, and Spark.

DATA ENGINEERING PROJECTS (GITHUB.COM/NOSAKHAREY)

FIFA World Cup 2026 Prediction Pipeline

- End-to-end GCP project: Terraform infrastructure, Kestra orchestration in Docker, dbt transformations, 7 BigQuery ML models, and a live Looker Studio dashboard.

GCS to BigQuery Pipeline (Terraform, Docker, Airflow)

- Provisioned Cloud Storage and BigQuery with Terraform and built an hourly Airflow DAG, running in Docker, that loads local data into BigQuery.

MSC Pharma Sales Analytics (Excel, Power BI, PostgreSQL)

- Analysed six years of pharmacy sales data in PostgreSQL and Power BI; found that Paracetamol drove 49% of units sold, with clear seasonal peaks.

Bash ETL Pipeline with Cron

- Bash script that extracts, transforms, and loads a public dataset, scheduled daily with cron and logged for troubleshooting.

LEADERSHIP

Team Lead | *SDGs Lagos Civic Organization*
Aug 2024 – Present
Lagos, Nigeria

- Lead a volunteer team on community projects, including a digital literacy initiative at Kuramo College.

EDUCATION AND CERTIFICATIONS

Bachelor of Engineering – Mechanical Engineering | *University of Benin*
Nov 2017 – Dec 2023
Benin City, Nigeria

Second Class Upper Honours | CGPA: 4.27 / 5.0

Certifications and Awards:

- Google Cloud Certified Professional Data Engineer (2026)
- Data Engineering Zoomcamp (2026) | Apache Airflow Certificate (2026)
- NYSC Discharge Certificate — 2025 | NSE Certificate (Nigerian Society of Engineers)
- Seplat Scholarship Award (2022)
